2. What problems did you run into? What is your plan for them?

I was having issues getting the data stored in the database to display in the frontend, however they were all rather quick fixes.

3. What is the current overall project status from your perspective?

The actual objective of the project is essentially done, all that is left is to make it so that the collected data is presented in a readable format. The current frontend does what its supposed to do, its just a matter of making sure we are interpreting the data correctly.

4. How is your team functioning from your perspective?

The team is functioning well so far.

5. What new ideas did you have or skills did you develop this week?

I have had to learn how to work with the previous team's alembic database.

6. Who was your most awesome team member this week and why?

Matthew was the most awesome team member for working with me on integrating the backend and frontend.

Plans for Next Week

What are you going to work on this next week?

I will continue working on the frontend to make sure that everything looks the way its supposed to.
