

Individual Weekly Report

Name: Josh Werner

Team: Bray IIoT Smart Solutions

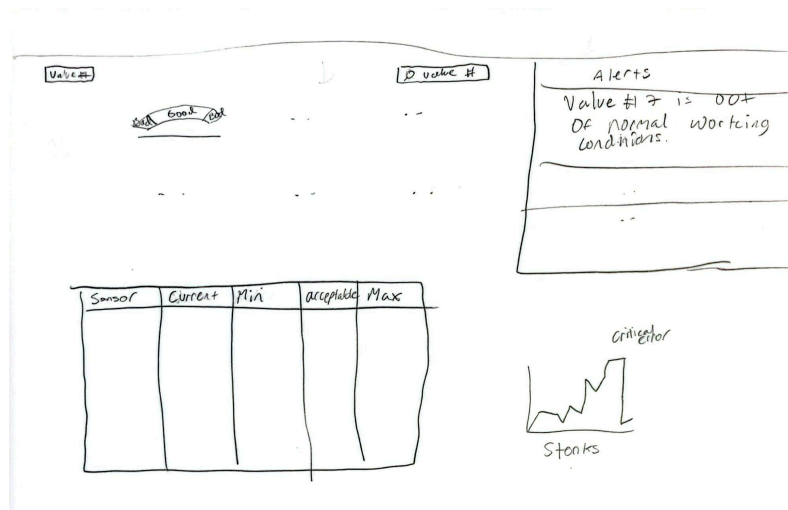

Date: 02/03/2025

Current Status

1. What did you **personally** work on this past week?

| Task | Status | Time Spent |
|--|-----------|------------|
| Project Requirements (Definition of Success) | Completed | 1 hour |
| Peer Review | Completed | 10 minutes |
| LoFi Prototyping | Completed | 15 minutes |

Include **screenshots/graphics** to illustrate what you did this past week:

2. What problems did you run into? What is your plan for them?

I struggled with defining the definition of success for our project given we currently have yet to discuss the exact project requirements with Bray. Therefore, the requirements given are not precise and have my undefined measurable values.

3. What is the current overall project status from your perspective?

I wouldn't like to say we are behind as in all likelihood we still would not have the hardware and other resources at this point already. But, given that we have not gotten in contact with our sponsor, it means the understanding of our project is lacking.

4. How is your team functioning from your perspective?

I think our team is functioning well, we are all willing to work together and take different responsibilities.

5. What new ideas did you have or skills did you develop this week?

I improved my ability to define measurable goals, in order to fill out the relevant section I had to research different possible requirements and consider how as a group we could show success in a measurable way.

6. Who was your most awesome team member this week and why?

Matthew Livesay, he has been attempting to be our contact point with Bray and although we have been unsuccessful, I appreciate his efforts along with his work towards developing questions to discuss with them.

Plans for Next Week

What are you going to work on this next week?

I will be working on developing our project implementation schedule along with interpreting our budget responsibilities. Also, I will be working on a reference search to develop our citations.
